

NX-P86

Surface-Mount Back Box (86 Type)

Durable surface-mount enclosure for exit buttons and switches where flush mounting isn't possible.

The NX-P86 is a surface-mount back box that lets 86×86mm exit buttons, switches, and readers be installed on solid walls, glass, or partitions where a flush wall cavity is unavailable. Moulded from rigid U-PVC with pre-formed cable knockouts, it provides a clean, secure mounting base for any compatible device.

KEY FEATURES

- ✓ **Surface Installation** — Mount 86-type devices on walls, glass, or partitions without cutting in.
- ✓ **Universal 86 Fit** — Accepts standard 86×86mm buttons, switches, and readers.
- ✓ **Multi-Side Knockouts** — Pre-formed cable entries route wiring neatly from any direction.
- ✓ **Rigid U-PVC Body** — Impact-resistant moulding protects terminations long-term.
- ✓ **Low-Profile Finish** — Clean design blends with the mounted device.

APPLICATIONS

- Glass doors
- Partition walls
- Retrofit installs
- Concrete / brick walls
- Exit button mounting
- Reader mounting
