

NX-ES135

Hotel Key-Card Energy Saver Switch

Insert the room card to power the room, remove it to save — automatic energy control for hotels.

The NX-ES135 is a hotel energy-saving switch that powers a guest room only while a key card is inserted. On removal, a short delay cuts power to lights and appliances, eliminating waste in unoccupied rooms. Rated for loads up to 6000W at 220V, it suits hotels, guesthouses, and serviced apartments.

KEY FEATURES

- ✓ **Insert-Card Power Control** — Room energises on card insert and powers down on removal.
- ✓ **Up to 6000W Load** — Handles room lighting, AC, and appliance circuits with ease.
- ✓ **Delay-Off Timer** — 8–12s delay lets guests reach the door before power cuts.
- ✓ **Automatic Energy Savings** — Removes wasted power in unoccupied rooms without staff action.
- ✓ **Standard 86 Mounting** — Fits standard wall boxes for fast, familiar installation.

APPLICATIONS

- Hotels
- Guesthouses
- Serviced apartments
- Resorts
- Hostels
- Dormitories
