

NX-C2F

Single-Fan Cooling Module

Plug-and-play roof-mount ventilation fan that keeps wall-mount server cabinets cool and stable.

The NX-C2F is a single-fan cooling module for 19-inch wall-mount server cabinets. Mounted on the cabinet roof, it draws heat away from switches, NVRs, and network gear to prevent overheating and extend equipment life. Its plug-and-play design and steel housing make installation quick and operation dependable in offices, IT rooms, and CCTV cabinets.

KEY FEATURES

- ✓ **Active Cabinet Cooling** — Continuously vents heat from packed wall-mount racks.
- ✓ **Single-Fan Module** — Compact roof-mount unit suits limited-space cabinets.
- ✓ **Plug-and-Play** — Connects directly to mains for fast, tool-light installation.
- ✓ **Steel Housing** — Rigid metal frame stands up to continuous duty.
- ✓ **Equipment Protection** — Stable temperatures guard switches, NVRs, and servers.

APPLICATIONS

- Wall-mount server cabinets
- Network racks
- NVR / DVR cabinets
- IT rooms
- CCTV racks
- Telecom enclosures
