01 OVERVIEW

The **NX-FP565** is a 65-inch 4K interactive flat panel built on NexaOS 5 with a 6 TOPS on-device AI engine — so lesson planning, live translation and handwriting recognition run on the panel itself rather than in the cloud. 40-point multi-touch on a Mohs 7 anti-glare surface delivers sub-8 ms writing latency, while a built-in OPS slot adds full Windows alongside Android without a second device. Stocked for immediate delivery.

02 KEY FEATURES

01 On-Device 6 TOPS AI Engine

Lesson generation, speech-to-text and live translation run locally — no cloud round-trip, no per-seat subscription.

02 40-Point Multi-Touch, Sub-8 ms

Ten users write at once with near-zero lag on Mohs 7 anti-glare zero-bonded glass.

03 Dual OS Without a Second PC

Android 16 for instant-on teaching; the built-in OPS slot adds full Windows i3/i5/i7.

04 NexaBoard AI Whiteboard

Shape and formula recognition, math graphing, split-screen compare and live polling — licence-free for the life of the panel.

05 NexaCast Wireless Sharing

Cast from any laptop, tablet or phone with four sources on screen at once.

06 NexaKey Cloud + NexaManage

Central OTA updates, app push and live status across every panel in the estate.

03 APPLICATIONS

Classrooms & Lecture Halls

Corporate Boardrooms

Training Centres

Government Briefing Rooms

Hospital Conference Rooms

Hybrid Meeting Spaces
