

CONFERENCE SYSTEM

Extension Cable

20 m Conference Unit Extension Cable

Shielded 8-pin DIN extension cable for extending conference-unit runs between host and microphone units

A 20-metre shielded extension cable for C-Yark digital conference systems, used to extend the hand-in-hand run between the host and conference microphone units, or between units, where longer cable lengths are required.

KEY FEATURES

- ✓ **20 m Length** — extends conference-unit runs where standard cables fall short
- ✓ **8-Pin DIN Connectors** — male / female inline connectors match C-Yark conference units
- ✓ **Shielded Construction** — protects the audio and control signal over long distances
- ✓ **Plug-and-Play** — inserts inline in the hand-in-hand conference wiring
- ✓ **Flexible Jacket** — durable, coilable cable for tidy installation

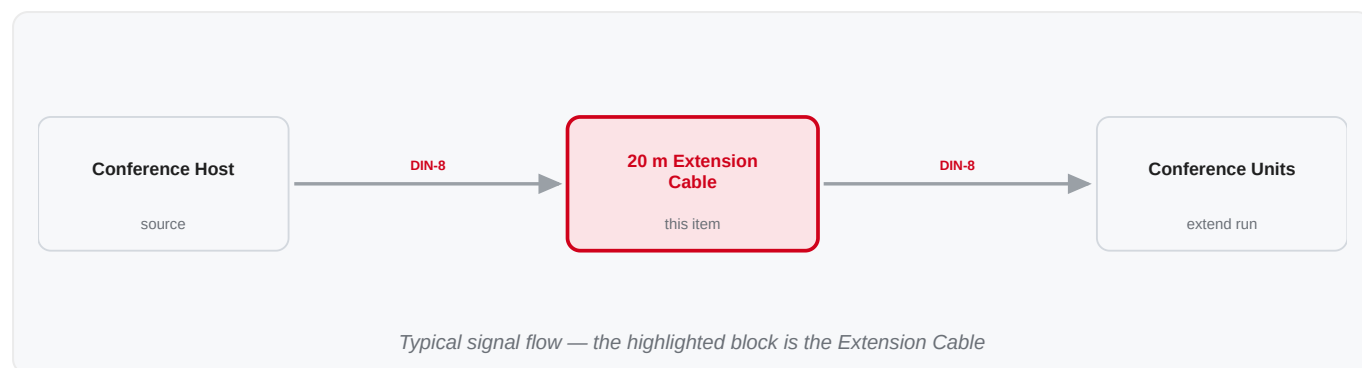

INSTALLATION NOTES

- Insert inline between host and unit, or between two units, to extend the run.
- Match the DIN-8 orientation (male to host side, female to unit side).
- Keep total loop length within the host's supported cabling budget.
