## 01 OVERVIEW

A 30 cm convex inspection mirror for checking the underside of vehicles at security checkpoints in hotels, banks, embassies, factories and government buildings. Supplied with a carry bag.

## 02 HOW IT IS USED AT A CHECKPOINT

## 01 VEHICLE STOPS

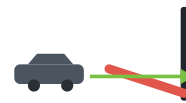

At the gate, before the barrier lifts.

## 02 GUARD SWEEPS UNDER

One pass along the chassis, standing upright.

## 03 BARRIER LIFTS

Checked vehicle proceeds; the mirror goes back in its bag.

## 03 KEY FEATURES

## 01 Checks under a vehicle without bending down

The guard sweeps the mirror along the underside at walking pace instead of crouching at every car.

## 03 For manned security checkpoints

Hotels, banks, embassies, factories and government gates — wherever vehicles are checked before the barrier lifts.

## 05 Pairs with the barrier at the same gate

Fits the inspection step in front of a NEXA GATE boom barrier at a controlled entrance.

## 02 30 cm convex acrylic head

The convex face widens the view, so one pass covers more of the chassis than a flat mirror of the same size.

## 04 Carry bag supplied

Keeps the head clean and scratch-free between shifts, which is what keeps the image usable.

## 06 2-year warranty in Bangladesh

Registered and serviced locally by the exclusive distributor — no overseas RMA.

## 04 TYPICAL APPLICATIONS

Hotels

Banks

Embassies

Factory Gates

Government Buildings

Secure Compounds

## 05 CHOOSING THE RIGHT MIRROR

|                                                                                                                                                                                                |                                                                                                                                                                                |                                                                                                                                                                                          |                                                                                                                                                                                       |                                                                                                                                                                                                         |

**NX-CM360**

Convex Safety Mirror, 60 cm

## 08 COMMON QUESTIONS

**Who uses this mirror?**

Manned security checkpoints at hotels, banks, embassies, factories and government gates, where vehicles are checked before the barrier lifts.

**What comes in the box?**

The inspection mirror and a carry bag.

**Why convex rather than flat?**

The convex face widens the view, so one pass along the vehicle covers more of the underside than a flat mirror of the same diameter.

**Warranty and support?**

Two years, with sales and service in Bangladesh from the exclusive distributor.

## 09 WARRANTY, SUPPORT &amp; ORDERING

**Exclusive Distributor**

DigiMark Solution is the exclusive Nexakey distributor for Bangladesh. The 2-year warranty is registered and serviced locally — no overseas RMA.

**Site Advice**

Guidance on mirror size, mounting position and viewing distance for the specific corner, ramp or gate before you order.

**Nationwide Supply**

Supplied through branches in Dhaka, Chattogram and the divisional offices.

**Project & Tender Support**

Specification text and quantities for parking, factory and government tenders, alongside the NEXA PARK and NEXA GATE ranges.
