

# FaceDepot-7A

## Thousands of Face Authentication Station

FaceDepot-7A is a facial access control terminal specially designed for entrance management. It is equipped with the latest deep-learning face recognition algorithm which enables faster and more accurate recognition. It also has ultrasonic distance detection sensor. Without stop and wait, users just pass and get verified easily.

FaceDepot-7A is available for installation above barrier or in front of door for access control applications including conference centers, financial institutions, school entrances and other critical areas etc.

### Features

- 7inch LCD with anti-explosion cover
- Dual-camera for live face detection
- Ultrasonic distance detected sensor, 50cm~150cm adjustable
- Semi-outdoor installation
- Compatible with external RS232, RS485 and Wiegand reader
- Compatible with ZKTeco and 3rd party barrier

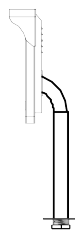

# Specifications

Model	FaceDepot-7A
<b>Hardware</b>	
LCD	7inch (1024 x 600 pixel)
CPU	Quad-core A17 1.8GHz
Memory	2G RAM/16G ROM
Camera	2MP dual lens
Communication	TCP/IP, 2ch USB RS232, RS485
Access	2ch relay
Audio	2 loudspeaker
<b>Capacity</b>	
Users	5,000
Face	5,000
Log	100,000
<b>Operating</b>	
Voltage	12V 3A
Temperature	-10°C ~ 45°C
Humidity	10%~90%
Software	ZKBioSecurity 3.0

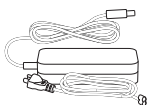

## Accessories

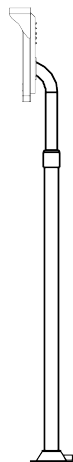

Sun canopy

Barrier Bracket  
(Optional)
